Applicant's or agent's file reference EX/EG-3081	IMPORTANT NOTIFICATION
International application No. PCT/ES2005/000025	International filing date (day/month/year) 21 January 2005 (21.01.2005)
Applicant S.A. I	DE VERA (SAVERA) et al

. Transmittal of the translation to t	ле аррисані.
---------------------------------------	--------------

٦	The International Bureau transmits herewith a copy of the English translation of the international preliminary report or
	patentability (Chapter I).

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).

2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

KR

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SM, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

2. Citations and explanations (Rule 70.7)

Reference is made to the following document:

D1: WO 0147796 A1

Closest prior art

D1, which is considered to be the prior art closest to the subject matter of claim 1, describes a rapid assembly/mounting system for lift guides such that each guide has a web/head, a precision-finished upper reference surface, precision-finished lateral reference surfaces and a flange on each side, and such that fishplates for aligning and fastening the guide ends are screwed onto each guide end (2).

2. Problem

The problem is that of simplifying the rapid assembly/mounting system for lift guides of D1. Said system requires a plurality of screws to be centred and tightened for each guide.

3. Solution

The solution is proposed in the characterising part of claim 1. The rapid assembly/mounting system for lift guides has fishplates, each of which extends between

PCT/ES2005/000025

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

the flanges either side of at least two guides. The structure of said fishplate is such that two plate portions, capable of moving on tightening means (screws) mounted on said plate portions, are placed opposite the flanges on either side. As said tightening means move said plate portions closer together, the latter are laterally clamped against the flanges. Each plate portion has alignment elements, which are centred and engage the machined areas of the guides.

4. Inventive step

The solution to this problem, as proposed in claim 1 of the present application, is considered to involve an inventive step (PCT Article 33(3)) for the following reasons: clamping the guides between two assembly plates provided with alignment elements is neither described in, nor suggested by, the prior art. Furthermore, in the absence of such a suggestion, a person skilled in the art seeking to solve the abovementioned problem would never arrive at the moving device proposed in claim 1.

Claims 2 to 14 are dependent on claim 1 and thus also comply, as such, with the PCT requirements of novelty and inventive step.
